

At SamfundsTanken we have successfully closed our seed round of \$1.6M for our prime project UBIseed on November 1<sup>st</sup>. We are moving right along to our Series A, due to the massive interest and the project developing ahead of schedule. Series A entails raising \$5M by mid 2019, which will cover the launch of our first pilots as well as the continued technical development of UBIseed.

We are already in the process of preparing to launch our first pilot projects. As we currently work with several telecom providers to establish world-wide coverage, we are excited to engage in developing the actual service package and moving forward in securing the platforms that will support UBIseed.

### We have expanded our goals

We recently had the opportunity to get on board with the Global Goals World Cup, and it is a team we're happy to join. Currently, UBIseed promotes more than half the stated UN Global Goals, and it is our ambition to excel within each goal to the best of our ability, as the goals align with our vision for UBIseed and the people whose lives it will affect and improve. We are honored to be invited.

### And we broadened our horizon

Part of our team went to New York recently, to participate in the SAP-supported AKOIN conference, where we had the opportunity to expand our network with investors and digital experts alike, as well as establish some new partnerships. We are happy to have established a working relationship with MannaCoin, and took time to contribute to a film about Unconditional Basic Income by Aram Hekinian, as UBI is the core of what led us to develop UBIseed in the first place.

### And attracted even more competence to SamfundsTanken

We are very lucky to have obtained a unique and competent sparring partner, LeadersBridge CEO Daniel Jordi, who now holds the title of Strategic Advisor and Marketing Partner at SamfundsTanken. He has already brought new energy to the project, and his engagement has us looking forward to each meeting.

### And we've started with building an Advisory Board to help us get to the next level.

Our Advisory Board will consist of 5-7 top level leaders who all believe that causes like alleviating poverty, eradicating hunger and strengthening the world economy are some of the most important things to tackle over the coming 10 years.

The leaders who will join us believe that Unconditional Basic Income is a key driver for reaching many of the UN Sustainable Development Goals by 2030.

### How you can join us on this mission

We strive to engage all of you, because we know you care. We know it takes many of you for UBIseed to reach its maximum potential, and your engagement can be the catalyst securing the wellbeing and security of our children. World-wide poverty will not solve itself, and by supporting UBIseed we offer you an actual tool to help eradicate poverty.

If you know Impact Investors, NGO Leaders or top Business Influencers in emerging economies who care as much about UBI as we do, please share this message with them. Inspire them to step up and join us on a mission to eradicate poverty.
